TUGAS PRAKTIKUM 1

Dockerized ROS 2 Development Environment

- **Screenshot docker/Dockerfile, docker/entrypoint.sh, docker/compose.yaml**

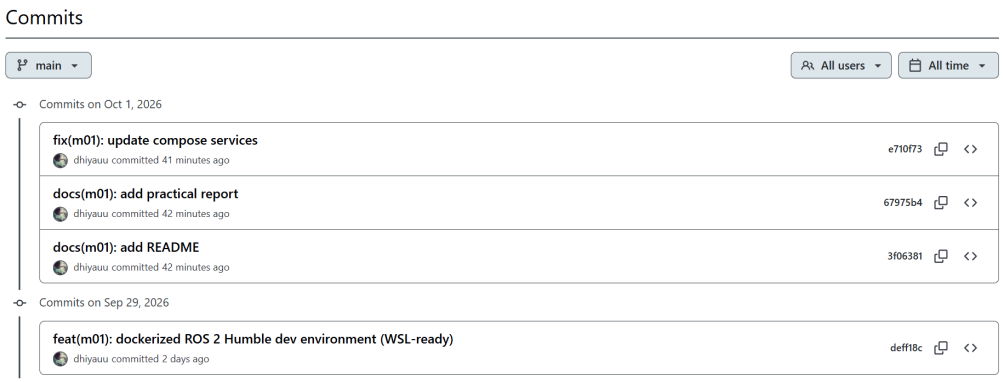

```
dhiyauu@LAPTOP-FCT96H5D:~/robotics-turtlebot3$ cd ~/robotics-turtlebot3
ls -l docker/
total 16
-rw-r--r-- 1 dhiyauu dhiyauu 1199 Sep 29 17:38 Dockerfile
-rw-r--r-- 1 dhiyauu dhiyauu  218 Sep 29 17:30 compose.wsl.yaml
-rw-r--r-- 1 dhiyauu dhiyauu  901 Oct  1 17:02 compose.yaml
-rwxr-xr-x 1 dhiyauu dhiyauu  142 Sep 29 17:45 entrypoint.sh
```

- **Screenshot Package My_first_robot_package yang berhasil di-build**

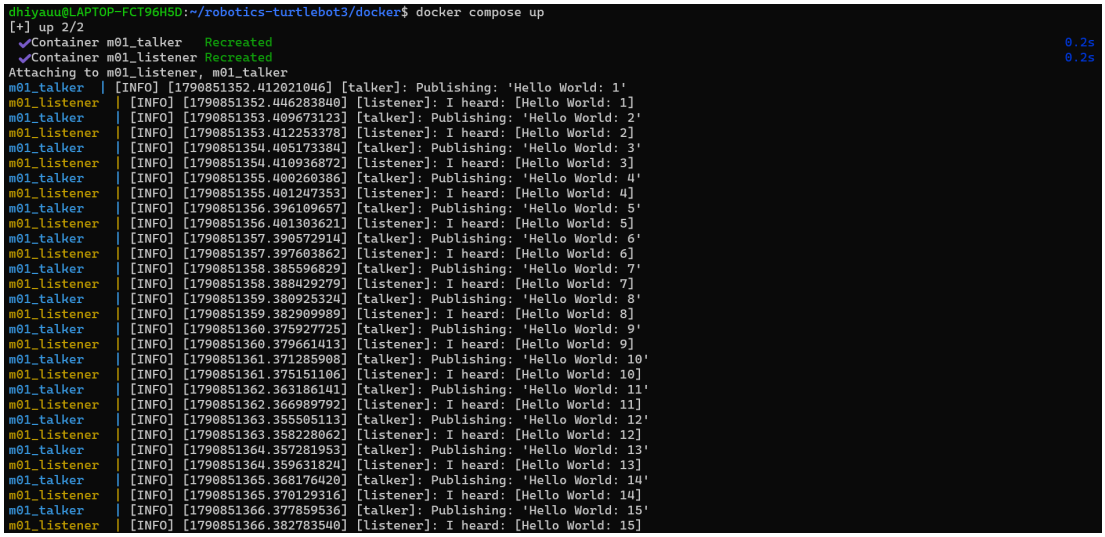

```
dhiyauu@LAPTOP-FCT96H5D:~/robotics-turtlebot3/docker$ docker compose --profile dev run --rm dev
Container docker-dev-run-9275f488cf2a Creating
Container docker-dev-run-9275f488cf2a Created
dev@LAPTOP-FCT96H5D:/ws$ colcon build --symlink-install
Starting >>> my_first_robot_package
Finished <<< my_first_robot_package [1.41s]

Summary: 1 package finished [2.06s]
dev@LAPTOP-FCT96H5D:/ws$ source install/setup.bash
dev@LAPTOP-FCT96H5D:/ws$ ros2 pkg list | grep my_first_robot_package
my_first_robot_package
dev@LAPTOP-FCT96H5D:/ws$ ros2 run my_first_robot_package hello_robot
Hi from my_first_robot_package.
dev@LAPTOP-FCT96H5D:/ws$
```

- **Screenshot Repositori Git dengan minimal 3 commit bermakna dan README.md**

- **Screenshot output docker compose up yang menampilkan Publishing dan I heard**

- **Screenshot ros2 node list berisi /talker dan /listener**

- **Laporan singkat docs/modul01_report.md (langkah yang dikerjakan + masalah yang ditemui)**

  modul01_report.md
